

Complete API List — Faculty Appraisal System

1. Auth & Profile

#	Method	Path	Called by	Key fields
1	POST	/api/v1/auth/register	Signup page	email, password, full_name, appraisal_role, school, department, designation, employee_id, phone, qualification, teaching_experience
2	POST	/api/v1/auth/login	Login page	req: email, password → res: token (JWT), full profile object
3	GET	/api/v1/auth/me	All dashboards on load	res: full faculty_profiles row
4	PUT	/api/v1/auth/me	EditProfile page	full_name, designation, department, school, phone, qualification, teaching_experience, employee_id, avatar
5	POST	/api/v1/auth/change-password	EditProfile page	current_password, new_password
6	POST	/api/v1/auth/forgot-password	ResetPassword page	email
7	POST	/api/v1/auth/reset-password	ResetPassword page	token, new_password

2. Appraisal Form — Load & Save (Faculty)

#	Method	Path	Called by	Key fields
8	GET	/api/v1/appraisal/snapshot?academic_year=X	All faculty dashboards on load	res: full payload JSON (all form sections)
9	PUT	/api/v1/appraisal/snapshot?academic_year=X	All faculty dashboards (auto-save draft)	req: full form JSON payload
10	POST	/api/v1/appraisal/submit?academic_year=X	Faculty submit button	req: full form JSON → saves to all section tables + declarations +

				appraisal_snapshots in one transaction
--	--	--	--	--

Note on #10: The submit must write to all section tables (teaching_process, course_files, etc.) AND upsert declarations with part_a_total, part_b_total, grand_total, status.

3. Appraisal Documents (File Uploads)

#	Method	Path	Called by	Key fields
11	POST	/api/v1/appraisal-documents	Faculty dashboards (PDF upload)	multipart: academic_year, section, doc_key, row_no, file → res: file_url
12	GET	/api/v1/appraisal-documents?academic_year=X	Faculty dashboards on load	res: list of document rows
13	DELETE	/api/v1/appraisal-documents/{id}	Faculty dashboards	—

4. Appraisal Summary & Scores

#	Method	Path	Called by	Key fields
14	GET	/api/v1/appraisal-summary?academic_year=X	Faculty dashboard (own summary)	res: part_a_total, part_b_total, grand_total, per-section scores
15	GET	/api/v1/appraisal-summary/{faculty_email}?academic_year=X	Authority dashboards (review view)	same as above, for any faculty

5. Authority — Dashboard & Review

#	Method	Path	Called by	Key fields
16	GET	/api/v1/dashboard/subordinates?academic_year=X	HOD, Director, Dean, VC, Center Head	res: list of { email, full_name, school, department, appraisal_role,

			dashboards	declaration_status, last_updated }
17	GET	/api/v1/dashboard/faculty/{faculty_email}?academic_year=X	Authority dashboard (open a faculty's form)	res: snapshot payload + all section rows with authority scores + reviews
18	PUT	/api/v1/appraisal-remarks/hod/{faculty_email}	HOD dashboard	academic_year, remarks, part_a_score, part_b_score, section_scores (per-section HOD scores), status
19	PUT	/api/v1/appraisal-remarks/center-head/{faculty_email}	CISR Center Head dashboard	same as above
20	PUT	/api/v1/appraisal-remarks/director/{faculty_email}	Director dashboard	same as above
21	PUT	/api/v1/appraisal-remarks/dean/{faculty_email}	Dean / Non-Eng Dean dashboard	same as above
22	PUT	/api/v1/appraisal-remarks/final/{faculty_email}	VC dashboard	same as above — marks appraisal as final

Note on #18–22: Each of these must also write the authority's per-section scores (hod_score / director_score / dean_score / vc_score columns) into the individual section tables, AND upsert an appraisal_reviews row for that reviewer role.

6. Non-Teaching Staff Workflow

#	Method	Path	Called by	Key fields
23	GET	/api/v1/non-teaching/appraisal?academic_year=X	NonTeachingStaffDashboard on load	res: full non_teaching_appraisals row (includes JSONB payload)

24	PUT	/api/v1/non-teaching/appraisal	NonTeachingStaffDashboard (submit)	academic_year, full form payload, status, self_total
25	GET	/api/v1/non-teaching/subordinates?academic_year=X	Registrar, ReportingOfficer, VC dashboards	res: list of non-teaching appraisals pending their review
26	PUT	/api/v1/non-teaching/review/{staff_email}	Registrar, ReportingOfficer, VC dashboards	academic_year, updated payload (with authority scores filled in), status, remarks, appropriate_total field

Summary Count

Area	Endpoints
Auth & Profile	7
Appraisal Form (load/save/submit)	3
Documents	3
Summary & Scores	2
Authority Review	5
Non-Teaching	4
Total	24

Once your backend has these 24 endpoints ready, share them and I'll migrate the entire frontend to call them instead of Supabase.
